## SUMMARY

I have accumulated extensive experience in programming languages and development tools,technical support and ICT project management.Proficient in network and system administration,coupled with website management and troubleshooting skills have equip me with robust foundation to excel.I have proven track record of installing,configuring and maintaining IT infrastructure along with providing field ICT specialist services.My ability to adapt to new technologies and provide innovative solutions aligns well with the dynamic nature of IT industry.

## EDUCATIONAL BACKGROUND

**Moringa School**                                                                                      **July 2022 – February 2023**
Software Engineering course
**Kibabii University**                                                                                  **August 2016 – March 2021**
BSc Computer Science
.

## PROFESSIONAL WORK EXPERIENCE

**ICT Technician**                                                                                      **January 2022 - April 2024**
**Sot Technical Training Institute –** Bomet, Kenya
- Responsible for network infrastructure where I managed to lay well point to point and LAN network to various departments in the institution.
- Supported in the website management where I was uploading and updating information on the website.
- Maintaining computer hardware and software applications inventory that help in decrease in loss of equipment.
- Prepared documentations such as memos,hardware and software inventory that aided in procurement and budgeting.
- I was not only limited to ICT Technician role but also part time instructor for several IT courses.
- As assisted system administrator I would assign new users and rights in the system.
- Successfully created and delivered an insight consultation between institution system developers by providing them with feedback to their system where needs to be implemented and modules to be added.

**Qitons Enterprise –** Bomet, Kenya                                                   **May 2021 - December 2022**
- Managed to install CCTV for surveillance to clients,computer repair and maintenance and sales of electronic equipment.

**ICT Intern**                                                                                          **January 2021 - April 2021**
**National Hospital And Insurance Fund –** Upperhill Branch, Nairobi
- Install and configure computer hardware operating systems and applications while monitoring and maintaining systems and network.
- Troubleshoot system and network problems ,diagnosing and solving hardware or software faults.

## EXTRACURRICULAR ACTIVITIES

**Digitisation committee** Secretary                                                   **September 2022 - April 2024**
Actively coordinated with 6 members, we drafted ICT policy ,reengineer business processes ,instituted measures for cyber security and data security.Finally identified and implemented business continuity strategies like disaster recovery plan,Backups and storage strategy.
**Social Media Manager**                                                               **September 2023 - April 2024**
I managed to create accounts in various social media and become proficient in content creation that helped the institution brand increase and generate leads.
